(54) PRODUCTION OF HOLLOW YARN MEMBRANE MODULE

(57)Abstract:

PROBLEM TO BE SOLVED: To perform certain potting by a centrifugal method and an immersion method without using a special jig and generating the levitation of hollow yarn membranes.

SOLUTION: In simultaneously bundling and fixing the end parts of hollow yarn membrane bundles 4 within one or more housing container by a potting material, in such a state that at least the end parts of the hollow yarn membrane bundles 4 are inserted in the housing 5, they are fixed to the proper place of a casting mold fixed with respect to the housing container 5 by a self-adhesive means (self-adhesive tape 9) to prevent the levitation of the hollow yarn membrane bundles 4 at a time when a potting material is injected.
